Site Safety Inspection: Team sheet

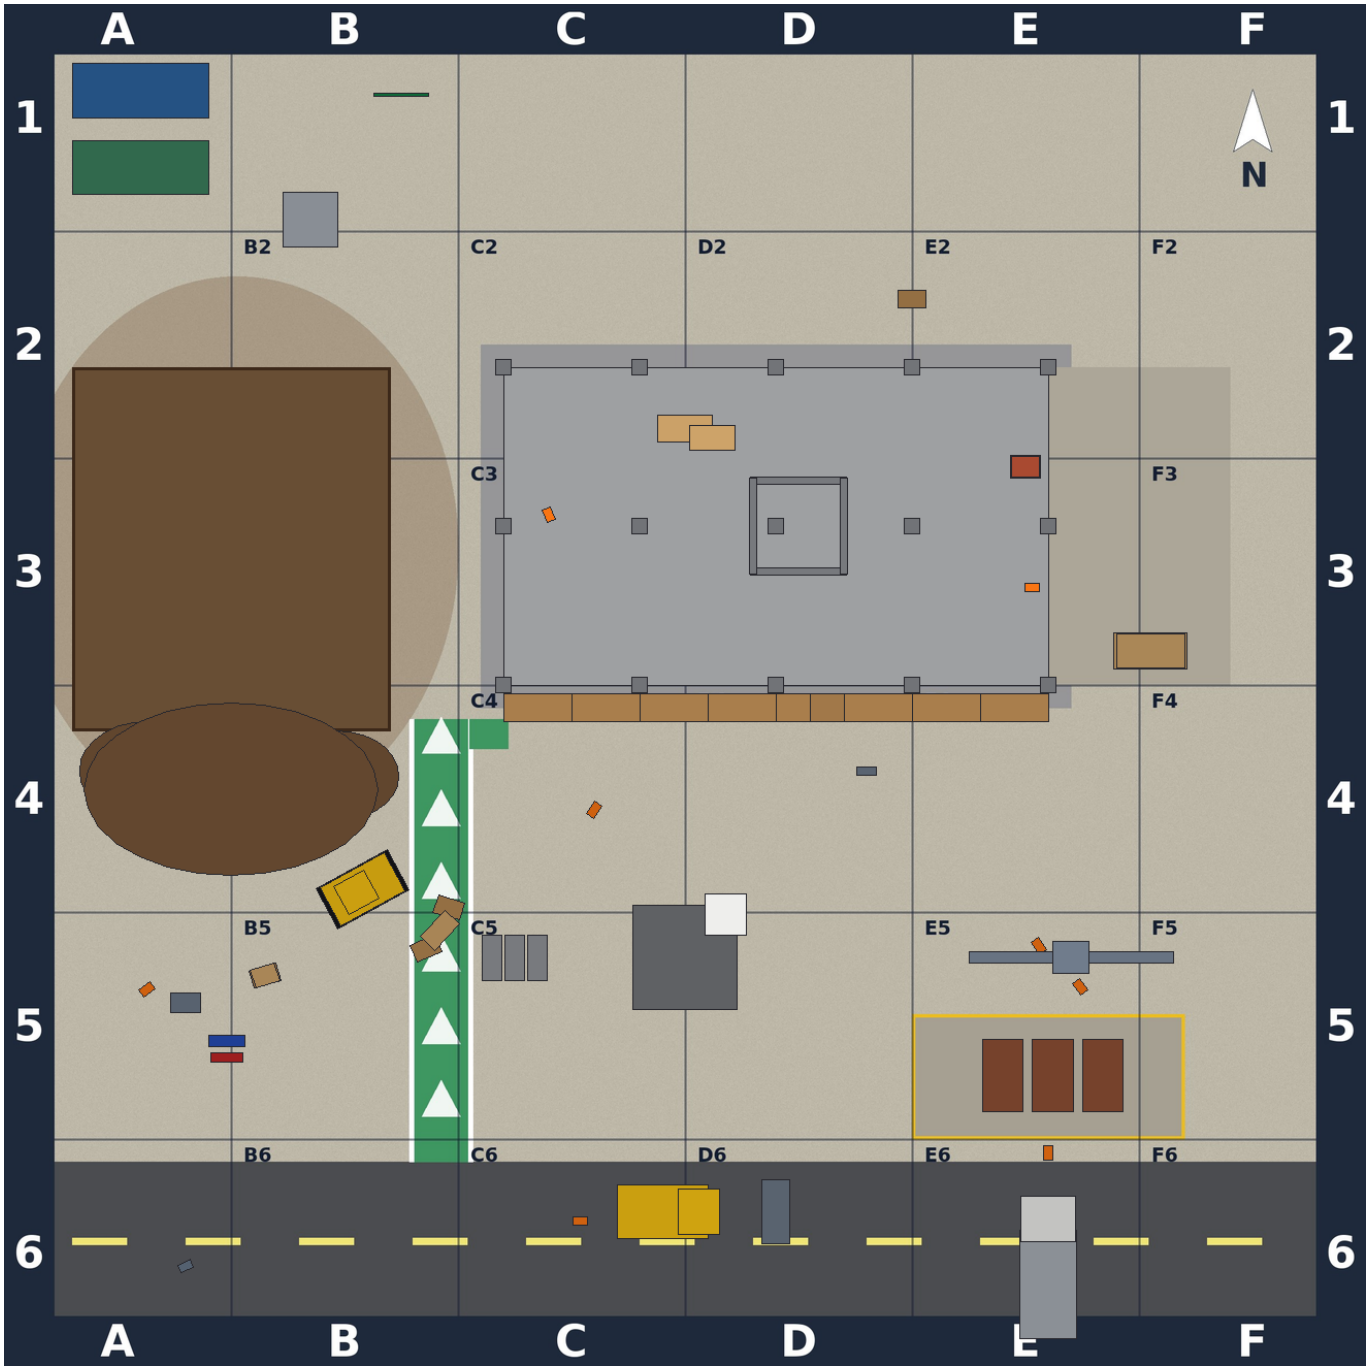

Team: _____ Names: _____ Time: 15 min

Look at the site plan (or the 3D model). The grid has columns A to F and rows 1 to 6, so every spot has a reference such as C3. For each hazard you find, write the grid cell, choose the type, and describe it in a few words. Some things on site are done correctly: a false flag costs points.

Types: F = Fall, S = Struck-by, C = Caught-in/between, E = Electrical, X = Fire/Explosion, P = PPE, H = Housekeeping/other
